# BRISTOL'S SARSAPARILLA.

## THE WHEREFORE OF THIS.

Candid men will be pleased with candor, and in all frankness the publisher of this Almanac will give in few words and plain style, the reasons for its appearance. They are simply these. Seven years ago, Mr. C. C. Bristol, (who was regularly bred to the business of an Apothecary, in the old and well known house of Lawrence, Keese & Co, 121 Maiden Lane,) being established in business in Buffalo, commenced the manufacture and sale of a preparation of sarsaparilla, compounded with other valuable and salutary articles, the combination and proportions of which, are the result of much care; which was soon found to be almost a specific for many terrible maladies, which had often set at defiance the whole skill of the faculty, and all the resources of the healing art. Bristol's SARSAPARILLA by its constant and invariable success in overcoming diseases of almost every kind, even the most inveterate and long standing, soon acquired for itself an enviable reputation, and astonished and convinced the public by the number and importance of its cures. As year after year passed on, its reputation grew wider, the first physicians of the country saw and acknowledged its merit, and testimonials from them, from those who had been cured and saved by its use, and from others who had witnessed its beneficent and health restoring powers, came in with every mail, and from almost every quarter. Bristol's Sarsaparilla thus won for itself a celebrity based upon its merits, and therefore permanent, and the demand for the article increased to such a degree that the proprietor began to have a fair prospect of receiving from its increased sale, some remuneration for the industry and perseverance with which through seven years, he had labored to lessen the evils of humanity.

In New York City, where the article had been introduced, where it had been instrumental in relieving a vast amount of misery, and where by the extraordinary cures it effected, and the invariable success that resulted from its use in even the most desperate and hopeless cases, a demand large and rapidly increasing for it had been created, its success excited the cupidity of a firm, hitherto thought respectable, who were anxious to obtain a lion share of the profits, supposed, though erroneously, to be great, which resulted from its sale, and who with this view wrote to the proprietor, the following letter:

(COPY.)

NEW-YORK, April 20, 1842.

MR. C. C. BRISTOL, Buffalo, N. Y:—

DEAR SIR—We have been selling during the year past considerable quantities of your Extract of Sarsaparilla, and think from the account we hear of its virtues from those who have used it, that the sale in this city may be much increased by paying it more attention in advertising. Our arrangements are such with the different papers that we can have advertisements inserted on much better terms than most others pay, and more conspicuously. If you would like to make an arrangement with us for selling it more extensively, we think it could be made of much advantage to us both. We have now four different stores, three of them in the best location in the city for retailing, and one for wholesaleing, and our facilities are such as will enable us to dispose of more of it, perhaps than any other house. We shall be much pleased to hear from you on this subject, or if you visit New York in the course of a month or so, to see you at our store, 79 Fulton street.

Yours, very respectfully,

A. B. & D. SANDS.

Failing to obtain the agency of Bristol's Sarsaparilla, and still bent upon reaping the fruits of his long and weary labors in the cause of benevolence, that very respectable firm has commenced a manufacture of sarsaparilla of its own, which is ushered "to the world" with a great flourish of trumpets in the hope of still securing to itself the profits of a demand for sarsaparilla, created solely by Mr. Bristol, or rather by his invaluable preparation. We will not stop to inquire whether it was exactly right or honorable in Messrs. Sands to make such an attempt to reap what he had sown; nor whether it was fair to impose upon the public a pretended discovery in the mode of preparation; nor whether it was exactly honest to state it as "the result of years devoted to laborious chemical experiments in testing various modes of preparation," with the fanfaronade which follows the quotation, when their own letter above shows conclusively that only three months before they had not so much as thought of such a thing; nor whether it was candid to exaggerate to such an unheard-of degree, the case of Paul Burdock, who was all the time he is represented to have been in such a loathsome and lamentable condition, salesman in a fashionable Broadway store, and waiting on genteel ladies every day; nor whether it was right as in case of JOEL B. PURDY, Grocer, to use his name without his consent; nor whether it was polite to refer people to Mr. JAMES BROWN, of the firm of Brown Brothers & Co., when that gentleman utterly refuses to see people upon the subject; nor whether it was manly and honest as in the case of THOMAS TURNER, to claim as their own a cure which has been really performed by Bristol's Sarsaparilla; nor whether it was modest and ingenuous to pretend so much in behalf of a preparation which has been returned as trash by surgeons in the navy, and other practitioners, and the genuine ordered in its stead, (all of which can be fully substantiated by the most irrefragable proof,) but come at once to the reason why this method has been taken of making the public acquainted with the true state of the case, and the real and genuine article.

For the purpose of monopolizing the sale of sarsaparilla, and of preventing a competition which must be fatal to their preparation, and their hopes of profit, the Messrs. Sands subsidized the Sun newspaper, and engaged its proprietor not to advertise any other sarsaparilla but theirs; the same thing was attempted with the Tribune, but its editors were to independent to be bribed to such injustice, and a similar application was made to Mr. Bennett, who says in the Herald of October 8th, "we can state that Mr. Sands called several times at our office, and endeavored to procure in the New York Herald the insertion of his advertisements, excluding those of all others, proposing to pay in money what we thought would be equivalent to the amount which all other similar medical advertisers paid." By this proscriptive exclusion of Bristol's Sarsaparilla from the press of New York, the Messrs. Sands hoped to keep the field clear to themselves, turn to their own advantage the demand created for his article, by the many and surprising cures it had effected in that city, and obtain for their own worthless compound (if good for any thing, it would not have been boosted up by so many misrepresentations and mis-statements,) the patronage which a "discerning public" intended for the genuine and invaluable preparation of Mr. Bristol. Denied access to the columns of a journal having a wide circulation, Mr. Bristol has adopted this method of presenting the claims of his preparation to the citizens of New York, believing that the oppressive monopolizing course of the Sun will justify him in so doing, and that the candid reader will see in this plain statement of facts, the proof that, while there are such things as humbugs in the world, he has only the desire of truth and justice.

## EVIDENCE OF REGULAR PHYSICIANS.

(From the entire Medical Faculty of Buffalo.)

Buffalo, August 12, 1837.

We are acquainted with the preparation of Sarsaparilla, manufactured by C. C. Bristol, and having made use of it more or less in our practice, believing it to contain the active principle of Sarsaparilla, in a highly concentrated form, and as a preparation, we esteem it the best we have ever met with.

CYRENIUS CHAPIN, *M. D.*

J. E. MARSHALL, *M. D.*

F. L. HARRIS, *M. D.*

H. R. STAGG, *M. D.*

(From the two principal Physicians of Canandaigua.)

Canandaigua, Dec. 17, 1837.

We have frequently prescribed Mr. C. C. Bristol's preparation of Sarsaparilla, in our practice, and have always found it to answer an excellent purpose in cases where Sarsaparilla was applicable. Our knowledge of the article has not been limited, and we can freely say that it is the best article of Sarsaparilla we have ever used.

RICHARD WELLS, *M. D.*

E. W. CHEENY, *M. D.*

(Extract from a letter from one of the oldest Practitioners in the western section of this state.)

Youngstown, June 11, 1838.

I have frequently prescribed your Extract of Sarsaparilla for a few years past, with much advantage, in chronic diseases, especially in Scrofula and obstinate cutaneous affections, attended with scrofulous habit.—Also, in secondary syphilis, and in chronic general debility, from almost any cause. It generally proves useful. I think your Extract the best preparation of Sarsaparilla I ever used. With much respect, yours truly,

J. A. HYDE, *M. D.*

(The following Certificates are from some of the most reputable Practitioners in the Country.)

Palmyra, June 2, 1841.

Mr. C. C. BRISTOL—Sir: We have used your Extract of Sarsaparilla in our practice, and for diseases arising from an impure state of the blood, and as a general renovator of the system we esteem it as the best article now in use.

D. D. HOYT, *M. D.*

WM. MAY, *M. D.*

Rome, July 24, 1841.

I am acquainted with the preparation of Sarsaparilla manufactured by C. C. Bristol, of Buffalo, and having made use of it in my practice, believe it to contain the active principle of Sarsaparilla in a highly concentrated form, and as a preparation, I esteem it one of the best I have ever met with.

A. MILLER, *M. D.*

Collins, July 5, 1841.

I have been acquainted with Bristol's Sarsaparilla, for a number of years, and have very frequently prescribed it in my practice, and have invariably found it to answer the desired effect. I consider the reputation of the article *established*, and where the *genuine* can be obtained, I have no hesitation in saying that a trial of its virtues will sustain my opinion.

S. C. NOYES, *M. D.*

# PROOFS OF THE EFFICACY OF **BRISTOL'S SARSAPARILLA.**

---

## **IMPORTANT CAUTION.**

**THE GENUINE ARTICLE HAS THE WRITTEN SIGNATURE OF C. C. BRISTOL, OVER THE CORK OF THE BOTTLE.**

---

**CERTIFICATES** of Cures of most inveterate, and long-standing cases of Scrofula, Cancer, Leprosy, Chronic Fever and Ague, the frightful diseases caused by a misuse of Mercury, Dry Gangrene, Prolapsus Uteri, Secondary Syphilis, Cutaneous Affections, Chronic Rheumatism, Liver Complaint, Erysipilus, Ulcers in the Stomach, Chronic Inflammation of the Eyes, Hip Complaint, Lupus, or Noli-metangere, Tic Doloieux, Dyspepsia, &c., in many instances of which the patient had been given up by the Faculty, are in the possession of the Proprietor, and have been before the Public in his various publications. In all these complaints, and many others not enumerated, Bristol's Sarsaparilla is a safe and certain remedy, and in some of them the **ONLY** one that can be relied on for a prompt and permanent Cure.

(From the New York Protestant Vindicator, Nov. 3, 1841.)

**BRISTOL'S EXTRACT OF SARSAPARILLA.**—We never notice the "all efficient" medicines, genuine or quackery of the day. But we have witnessed a case in one of our own executive Committee, which we cannot pass over in silence. We allude to the remarkable cure of Mr. Thomas Hogan, who is well known in our city, and to our city authorities, from his official duties in the City Hall. He was brought to the very gates of death by a most painful disease in the face and head. It was pronounced a Scrofulous affection. His physicians ceased their visits; and he was dispaired of by his family; while his friends expected daily to hear that he was consigned to the tomb. But we are all the delighted witnesses of his unexpected restoration to health; so that he can go about and attend to business. And all this we know, was effected simply by his taking strictly according to the rule, Bristol's Extract of Sarsaparilla.

It seems to be a duty we all owe to our afflicted fellow men, to let them know valuable facts, that they may in desperate cases of Scrofula and its cognate affections, try what has wrought a marvellous cure on others.

This is no puff of quackery. Mr. Hogan is willing to explain and give all proper information on this matter to those who may wish to see him. He is to be found at 203 Stanton-street, N. Y.

*New York, August 5, 1842.*

MR. J. MILHAU—SIR—A delicacy in appearing before the public, has hitherto prevented me from giving to the world the following synopsis of my severe and afflicting diseases, as also the medium through which they were effectually removed, and I restored to my long lost health and vigour. The obligation I owe to my fellow-men, demands of me (and from which I can no longer refrain,) to state what has proved for me a thorough cure, and raised me from a state of entire helplessness to soundness and activity. It was simply Bristol's Extract of Sarsaparilla, purchased at your store, 133 Broadway. During the fall and winter of 1840, and the spring and summer of 1841, I was grievously afflicted with Chronic Rheumatism, from my head to my feet; in addition to this, my head was dreadfully distressed with Catarrh, and that most distressing affliction of the nerves, Tic Doloieux. After suffering beyond my power to describe, wasting to a mere skeleton, my disease merged into an aggravated and stubborn form of Scrofula, causing an exfoliation of the soft bones of my nose, and ten pieces of bone came from my head. I was confined to my room for eight months, being attended by two medical gentlemen of skill and experience, and in whose practice I have still the utmost confidence, and should occasion require medical aid, I would feel myself safe in their hands. But every effort to arrest my complaints, proved unsuccessful, and I gave up all hope of being cured, or my affliction in the least mitigated, until time should be with me no more; in this state my physicians left me. I gave up the use of medicine altogether, remaining in this situation for about five weeks. A bottle of Bristol's Sarsaparilla was providentially brought to me from a friend, who knew the virtues of it, having witnessed its effects on others. I looked at the bottle with doubt, believing it to be nothing more than what I had already tried in different preparations of Sarsaparilla, and I concluded not to torment myself with anything more during the short time I remained on earth.—My companion however, persuaded me to try it, and I commenced using Bristol's Sarsaparilla, little thinking at the time, I should be here to day, and that through the instrumentality of it alone—but such is the fact. I am now well and hearty, which I honestly declare was effected by Bristol's Extract of Sarsaparilla alone, and nothing else. At first I could not perceive any effect from the use of it, and continued it merely on account of its affording me a pleasant drink, but after having used seven bottles of it I began to discover a change for the better. I persevered in the use of it, and in four months from the time I commenced, I was as well and comfortable as I could wish to be. Nearly nine months have elapsed since I ceased the use of Sarsaparilla, and I have not had occasion for it, or any other medicine since. I was reduced in my weight sixty-six pounds, and in the spring of this year my weight was at its usual standard. I write this not as a puff, or as an article to excite the curious, but as an act of justice to the proprietor, Mr. C. C. Bristol, of Buffalo, to whose medicine

I ascribe my restoration to health. Also, that those afflicted with similar diseases, may know what to apply as a speedy, safe, and effectual remedy. Since my recovery I have witnessed its happy effects on more than fifty of my acquaintances, and am daily enquired of in reference to the same. With this brief statement of my case, I close with saying, that it will afford me pleasure at any time, to inform any who desire to know, of the efficacy of Bristol's Extract of Sarsaparilla.

THOMAS HOGAN,

203 Stanton Street, New-York.

New York, Oct. 29, 1842.

MR. C. C. BRISTOL—SIR:—The motive that prompts me to address these lines to you, arises from a conviction paramount to that of mere praise of your valuable Sarsaparilla, for if that was my desire I should fail in the attempt, for I feel as though it would require a more powerful pen than mine to do justice to the high claims of so valuable a medicine as Bristol's Sarsaparilla.

It is the obligation I owe as one of the vast family of man to those like myself, whose misfortune it has been to be afflicted as I have for several years past, that induces me, without solicitation, to make known to the world what has been an effectual remedy when and where the hope of a cure was almost extinct.

I had been informed that you were to visit this city this fall, when I expected to have had the pleasure of stating to you what your Sarsaparilla has done for me, but in this I was disappointed, you having left the city before I knew it; I have therefore taken this method to inform you, and through you, all who may desire to know what my afflictions were, and also what has proved an antidote to the same. I was attacked with Scrofula in a very alarming form about five years since, which spread rapidly through my head face and throat, internal and external; there were several holes in the roof of my mouth and about the palate, which was nearly destroyed—my speech and hearing so much affected, as to leave but little hope that those senses would ever return to me again as they now are. One of my ears was partly destroyed, my nose and the greater part of my face to all human appearance, must meet the same fate.

My nerves were dreadfully affected, so as to deprive me of rest or sleep that was anything like natural, but as one frenzied I passed my sleepless nights and wearisome days. My lower extremities were deathly cold and inanimate. My feet were greatly extended in size from what was called the dropsy; and in addition to this for many years I was afflicted with Piles in their most severe and distressing form, which is now removed, together with most of my great afflictions, through the use of your Sarsaparilla alone, after having the best medical treatment the city afforded.

I am now nearly well—my face has been saved, my mouth and throat healed, my speech and hearing restored, my sight improved, which was very doubtful, my sleep become natural, and my appetite good; in a word, I am a different person in feeling and appearance, and there remains not a doubt but that Bristol's Sar-

sarsaparilla will effectually accomplish a thorough and lasting cure of all my afflictions.

I am at a loss for language and terms strong enough to speak of your Sarsaparilla as it deserves. It has been to me everything—to it I owe the preservation of my life under the direction of a wise Providence, and were I capable, I would proclaim to all the world what Bristol's Sarsaparilla has done for me. It will afford me pleasure at any time to inform any person who may desire to know any thing I know of Bristol's Sarsaparilla.

Yours, respectfully,

OPIHELIA GORDON,  
*No. 10 Orange Street.*

*Hartford, Conn., Sep't 29, 1842.*

MESSRS. DICKINSON & GOODWIN:—This may certify, that I have been a subject of Inflammatory Rheumatism for the last eighteen years, and often confined to my bed from four to six weeks by each attack. I have tried every popular remedy that the most celebrated of the Medical Faculty of New York could prescribe, besides any quantity of quack medicines, but did not obtain permanent relief.

Soon after resuming my residence in Hartford, I had the most severe attack I ever had. I was confined to my room two months and when I left it I was scarcely able to walk, and not without the most severe pain. My lameness continued from last October to June following.

Having business in New York last February, I was there introduced to a gentleman by the name of Thomas Hogan, who highly recommended Bristol's Sarsaparilla. He told me he had been confined to his bed eight months with Rheumatism and Scrofula, and his physicians had given him up as past recovery. He used fifteen bottles of Bristol's Sarsaparilla, and it was to this medicine alone that he attributed his present existence.

I concluded to defer the trial until I returned to Hartford, and again consult my physician, whose prescriptions I followed till May without relief. I then bought Bristol's Sarsaparilla of you, and continued taking it according to directions. After taking five bottles I found material relief. I then visited New York again, and was there introduced to Mr. Bristol, who advised me by all means to persevere. I called on twenty different individuals of the first respectability, who had been cured of all the ills that flesh is heir to, who all attributed their restoration to health, entirely to this invaluable medicine. With all this testimony, I continued till I had taken sixteen bottles, which has restored me to perfect health. I shall be happy at any time, to give any one all the information that I am possessed of, in regard to this invaluable medicine, and confidently recommend it to all who are afflicted with the disease for which it is recommended.

Respectfully, yours,

S. L. MOORE.

Utica, Oct. 10, 1842.

MR. C. C. BRISTOL—SIR:—Two or three days since a friend invited me to a ride to see a most remarkable case of the cure of Scrofula by the use of your Sarsaparilla. The details of the case are such, that it is due both to yourself and to suffering humanity, that they be made public—and I am prompted by these considerations to address you.

The person affected, is Mrs. Parmelia Slaven, residing in the edge of New Hartford, about two and a half miles from Utica.—Two years ago last month, she perceived a small sore on the top of her head, which had been preceded by very severe pains in that region. This sore speedily began to discharge most offensive matter, the pain continuing and wearing upon the constitution of the patient. Ordinary means were resorted to to remove the difficulty but to no good purpose, the sore spreading rapidly, and discharging profusely the same offensive matter. A number of the best physicians were from time to time consulted, but without procuring relief—one or more of these pronouncing the disease incurable.

The sore became as large as her two hands, as she expressed it, and the whole side of the body nearest the sore much affected, her general health became much impaired, her appetite gone, and unable to sleep. She was, to use the language of her family, "very low," and they gave up all hopes of her recovery. Another sore appeared under one of her shoulder blades, and her system was gradually sinking under the disease.

At this moment of extremity, a young lady in her neighborhood suggested the trial of your Sarsaparilla, and with no great faith on the part of her friends, it was procured of your agent, Wm. Bristol of this city. This was during the month of February last. Her family now say *that in a week* after she began using it they perceived a change in the appearance of the sore; the foul discharge became less in quantity, and less offensive. She says she distinctively felt a change for the better in that short time; in a fortnight a decided improvement was visible, her appetite improved, sleep returned, and the sores were both better. This improvement has been constantly going on till the present day; leaving, it is true, a large scar on the top of the head, as a sad proof of the ravages of the disease. Her health is now perfectly restored, and her gratitude is inexpressibly great, both for the medicine and the kind friend who first brought it to her notice. On one occasion she found an article advertised in this city, as "Bristol's Sarsaparilla," which had not the effect of yours, and during its use she distinctly perceived that her cure was retarded. She says the taste of the article was entirely different from that of yours. Too much care, therefore, cannot be taken in procuring the genuine article.

This simple recital of facts speaks for itself. To all appearance this person was fast sinking under the dreadful Scrofula, or if not Scrofula, a disease of equal malignity. At this crisis, she resorted to your Sarsaparilla, and beyond all question, that, and *that alone*, has effected a perfect cure.

The patient herself, together with her family and friends, desire that these facts should be made known to you, and I am happy in being the organ of their communication.

I am, sir, your obedient servant,

JOSIAH T. MARSHALL.

Clarence, N. Y. Dec. 13, 1841.

MR. C. C. BRISTOL,

DEAR SIR—I understand there are persons in Buffalo who dispute the publication of the case of my son James, which is substantially true, and he can be seen at my house in Clarence at any time. There is a *piece* of a boy yet living, and healing as fast as possible, and in health so as to receive his regular meals with a good relish; his left arm is almost healed up, the other piece of an arm is healed up so that we think it no trouble as there is but one small spot about as big as a sixpence, his legs are healing finely, and he feels perfectly contented.

I will in as few words as possible give you the life of my son James. He was born April twenty-second, 1826, a smart active youth, and remained so until April third, 1831, when he was attacked with *measles* and took cold; the Physicians sent him a portion of mercury, which struck him almost lifeless, and from that time he grew deaf and blind. In September his right arm became a running sore. In the winter of 1833 his eye sight was restored, and in the spring following, a number of ulcers broke in the glands of his neck and roof of the mouth, and other places which continued eating until the fall of 1835. We then gave up all hopes of relief, and the disease stood still apparently until the third of March 1839, when his *right arm and both legs turned black and rotted off and left his body in two months*. A number of other spots of flesh came out to the bone, and were on the decay until the tenth day of September 1841, when you saw him, and gave him your Sarsaparilla, the result has been that the disease was stopped, the sores healed, and he is getting well as fast as can be expected, considering the situation he was in and has been for ten years past. I am much obliged to you for the favors you have shown me, and remain,

Yours, sincerely,

PETER WYCKOFF.

Utica, Oct. 16, 1841.

MR. C. C. BRISTOL, BUFFALO:—

This is to certify that my grandson, aged twelve years, was about four years since, taken with an affection pronounced by the physicians, *Leprosy*. It commenced in the shape of a ringworm, and extended over the whole body, so that when he was undressed, large scales resembling snow flakes came off with his clothes, and would frequently cover the carpet for a foot round. Several of our most eminent physicians treated him for a long time, and finally gave him up, and told us there was no hope of his ever getting well. On the second of April last, I purchased from Mr. Bristol, your agent in this city, a bottle of your Sarsaparilla, and have continued giving it until about three months ago, when he was so well

as to be able to go into the country, where he is engaged on a farm, and has continued to improve ever since. He is now entirely recovered, is as smart and healthy as any boy of his age, and perfectly free from any appearance of the disease.

We ascribe his cure entirely to the use of your medicine, and regard his recovery as almost a miracle. I will be pleased to give farther particulars to any one who may be desirous of having all the facts in the case, as they cannot be embodied in a certificate of any reasonable length.

EZRA RICHARDSON.

*Massilon, Ohio, Nov. 20, 1842.*

MR. C. C. BRISTOL,

DEAR SIR:—It is now about eight years since my wife first became afflicted with a sore inside of the nose, or "*Septum Nosi*," which was attended with frequent profuse bleeding, and a twinging painful sensation, that defies description. After various simple means were used, which seemed to irritate rather than heal the sore, our worst fears were confirmed on calling a physician, who pronounced it a CANCER. The best and oldest remedies known to the faculty, were immediately resorted to—persons who made this class of diseases their study, were consulted, and in short, no remedy was left untried, that we could hear of, that had arrested this growing, unrelenting destroyer of human life; but with very little, if any success. The thoughts of my wife being eat up alive by atoms, was too painful to be endured. It was at this trying time, (now a little more than a year,) I met with an old acquaintance, who recommended your Sarsaparilla. I immediately procured two bottles, which did not produce much effect. I then procured half a dozen; and it is now with the utmost pleasure I can inform you, that by continuing its use, I believe a complete and permanent cure was effected. I shall be pleased to give further particulars to any one who wishes to call on me at my residence in West Massilon.

S. J. JOHNSON.

*Henderson, N. Y. June 21, 1842.*

MR. A. B. HULL—DEAR SIR—I feel it to be due to the public and to the proprietor of "Bristol's Sarsaparilla," to make the following statement. I have been troubled with a cancer for more than *twenty years*, which has been attended with great pain, without receiving any benefit from different medicines until I commenced the use of Bristol's Sarsaparilla. The pain ceased after using the second bottle. I have used several bottles, and find great benefit from it—I have every expectation of a complete cure.

ELISHA CROSBY.

(From H. Greeley Esq. Editor of the N. Y. Tribune.)

*New York, Sep. 3, 1842.*

The virtues of Sarsaparilla as a restorer of purity to the blood, and consequently a cure for maladies resulting from its impurity, have been sufficiently set forth by numberless preparers and certificates. We will add a case within our own knowledge. A friend had a young child dangerously diseased with tumors as well

within as upon its head, which had long defied medical skill. He stated his fears to us, and we, pretending to no knowledge of medicine, urged him to try a bottle of Bristol's Extract of Sarsaparilla, as we knew Mr. B., and had faith in his statements. He followed our advice, and cured the child immediately. This was two years ago, and we saw the little fellow yesterday in excellent health.— So much we know and can certify, and we believe the child is living now by virtue of that Sarsaparilla.

*(Dr. Harrington an esteemed Physician of Erie County, Certifies to the cure of an aggravated case of Prolapsus Uteri, of twelve year's standing, as follows:)*

*Alden, Jan. 17, 1842.*

I have been lately the physician to Mr. Maynard and was called to see him during his illness some time in the month of August or September last, and I must say I was much surprised to see Mrs. Maynard officiating as his nurse, and attending to his wants while he was sick.

Her case was one that I was conversant with but never prescribed for; it was Procidencia, and for most part of seven or eight years she had been obliged to be conveyed about the house, and nursed in a cradle constructed for the purpose. Until she commenced the use of Bristol's Sarsaparilla, her disease resisted the best medical treatment. I was frequently called to consult with Dr. Gage in her case, but the disease had assumed such a form that my opinion was that medicine would have no effect in producing a cure.

I am perfectly convinced that her recovery is entirely attributable to the use of Bristol's Sarsaparilla.

JOHN M. HARRINGTON, M. D.
